Professional Summary

Data professional with experience working with large datasets to analyse trends, support forecasting, and assess risks. Skilled in Python, Power BI, and Excel, with a strong foundation in data preparation, automation, and exploratory analysis. I translate complex data into practical insights that drive planning and decision-making.

Skills

- **Programming and Data Handling:** Python (pandas, NumPy); SQL; Advanced Excel (automation, pivot tables)
- **Reporting and Visualization:** Power BI (interactive dashboards, KPI tracking)
- **Analytics and Machine Learning:** Time-series forecasting; Exploratory Data Analysis (EDA); Principal Component Analysis (PCA); Supervised learning (Neural Networks, SVMs)
- **Soft Skills:** Stakeholder-facing insight delivery; Data Storytelling; Cross-functional collaboration

Professional Experience

Ministry of Finance, Labour and Transfers *Prishtina, Kosovo*
Head of Analytics and Fiscal Risks Analysis Division Sep 2024 - Present

- Supervise the design, development, and maintenance of fiscal indicator databases, improving data quality, structure, and accessibility across the department.
- Designed automated KPI dashboards in Power BI for periodic tracking of fiscal performance.
- Oversee the preparation of the Fiscal Risks Statement, integrating data-driven analysis and visualization to support fiscal policy decisions.
- Lead the Labour Market Demand project, supervising the team's web scraping and data cleaning efforts, and contribute to predictive modeling and analysis in Python for business category classification and labour market insights.
- Initiated automation of data workflows using Python and Excel, reducing manual effort and increasing analytical efficiency and reproducibility.
- Led and contributed to 4 cross-functional technical working groups that ensured the effective planning, execution, monitoring, and evaluation of ad-hoc government fiscal packages.
- Automated processes for the Social Assistance Pilot and Vulnerable Energy Consumers Program by developing Python scripts for calculations and beneficiary selection, achieving a 100% reduction in manual effort.

WorldQuant *New York, USA*
Research Intern Jan 2024 - May 2024

- Cleaned, transformed, and analyzed large financial and economic datasets using Python (Pandas, Numpy).
- Created a dashboard using Matplotlib and Seaborn to visualize variable correlations and model findings, adopted by supervisors to guide further research.
- Developed and optimized feed-forward and recurrent neural network models to predict macroeconomic influences on factor returns, providing actionable insights for downstream alpha research.

Ministry of Finance, Labour and Transfers *Prishtina, Kosovo*
Senior Macroeconomic Modeling Officer Feb 2021 - Aug 2024

- Implemented macroeconomic forecasting models in Python and EViews, predicting government revenue, GDP, and inflation with 95%+ historical accuracy to inform annual budget decisions.
- Contributed to the development of a real-time GDP nowcasting system using high-frequency economic indicators, enhancing forecast accuracy and supporting timely policy decisions.

- Developed an Excel database of the main economic indicators and two additional separate databases with calculations for GDP and inflation, improving data accessibility for the division.
- Drafted sections of the macro-fiscal framework for major documents, including the Economic Reform Program, Medium Term Expenditure Framework, Annual Budget Law, and Quarterly Macroeconomics Bulletin.
- Co-led a team of 15 as Vice-Head of the Secretariat for the National Strategy on preventing and combating the informal economy, ensuring timely reporting, delegating tasks, and collaborating with stakeholders.

Ministry of Finance, Labour and Transfers *Prishtina, Kosovo*
Senior Property Tax Officer Jan 2021 - Feb 2022

- Pioneered a strategic plan to enhance property tax debt collections, resulting in a 10% increase in revenue collection across two pilot municipalities.
- Introduced statistical forecasting methods (OLS regression and moving averages) to replace flat growth assumptions, enabling more reliable municipal budget projections.
- Analyzed sales contracts, location data, and land conditions to evaluate nationwide property value zones, supporting more accurate property tax assessments.

ProCredit Bank *Prishtina, Kosovo*
Intern Jun 2018 – Dec 2018
Processing Officer Jan 2019 – Jul 2019

- Analyzed client account activities to ensure accuracy and compliance with regulatory requirements.
- Delivered customer service support for banking transactions and information.
- Supported the MIS Division by extracting and analyzing data with SQL queries.

Education

Massachusetts Institute of Technology (MIT) **edX Platform**
MicroMasters in Statistics and Data Science *May 2025 - Ongoing*
Probability, Statistics, Machine Learning, Deep Learning, Statistical Modeling

George Washington University **Washington DC, USA**
IFC-Milken Institute Capital Markets Program *Sep 2023 - Dec 2024*
Quantitative Analysis for Capital Markets, Corporate Finance and Risk Management, Business Cycles and Financial Crisis

University of Westminster **London, UK**
MSc Economic Policy and Analysis *Sep 2019 - Oct 2020*
Data Analysis, Macroeconomic Analysis, Economic Appraisal and Evaluation

University of Prishtina **Prishtina, Kosovo**
Bachelor of Banks, Finances and Accounting *Oct 2015 - Oct 2018*

Honors and awards

EU Scholarship: **Young Cell Scheme Program** (Economics Sector) 2019 - Competitive scholarship awarded to 10 top students in Kosovo for postgraduate studies abroad.

Certifications

- CS50x 2022 – HarvardX, 2022
- Macroeconometric Forecasting and Analysis – IMF Institute, 2023
- Data Science Methodology - IBM, 2023
- Python for Data Science, AI & Development - IBM, 2023
